

Summer Term 1 2024

Class 4 Home Learning

There are 3 areas of homework to complete each week:

1. **Reading:** You should read for 20 minutes each day. The expectation is that you will record when you have read in your Reading Record at home. When you read, think about what you have read, collect examples of rich vocabulary and discuss your book with an adult regularly. Vary the authors, genres and text types you select and strive to read from the Reading Rocket selection often.
2. **Maths:** You should log on to Times **Tables Rock Stars and Numbots** at home at least 3 times each week to practise your tables and arithmetic skills.
3. You need to choose either an **English or a maths activity** to complete in your homework book and hand this in on **Monday**. Try to choose from each section over the term. Books will be returned to you each **Thursday**.

Trying your very best, being organised with homework and meeting these expectations will result in house points, stickers or certificates and, of course, you will be learning, practising key skills and becoming an independent learner. If homework is not handed in, the consequence will be to complete the missing work during break time on Friday morning.

English Activities:

- Find a character description from one of your favourite books. Copy out some of your favourite sentences. Why do you like this description? Be ready to share the description with the class.
- Select an Anglo Saxons reading comprehension sheet.
- Find interesting information and pictures about any Anglo-Saxon ruins that can still be found today. Present this information in an interesting way of your choice.
- Improve your SPaG skills by working through the inverted commas sheet.
- Work on your presentation skills by finding a poem that you really enjoy reading and write it out in your neatest handwriting. I look forward to reading your chosen poem!
- Current Affairs – Can you research a news article that you find interesting? Put together a short presentation or powerpoint to share with the rest of the class. Any Powerpoints, please email to the office so that we can share them.

Maths Activities:

- Which timetable is the hardest for you to remember? Create a rhyme or poem to help you learn it. Can you teach someone else your poem or rhyme?
 - Keep practising your times tables using your favourite method (you can use hit the button, a written method or ask someone to test you). Can you improve your time? Can you answer a question in 6 seconds or less?
 - Write down 10 decimal numbers up to 2 decimal points. Then write them in order from smallest to biggest. Eg: 0.43, 0.44, 0.67.
- Challenge yourself to include some with the same number in the tenths column.**
- Choose a fraction sheet and shade and label fractions of shapes.
 - Complete the fraction problem solving sheet.
 - <https://www.topmarks.co.uk/maths-games/daily10> (type in top marks daily ten to the search engine if you cannot use the link).
Practise your maths skills on the daily 10 game. Level 4 includes adding and subtracting 4 digit numbers. If this is too challenging try a lower level and build up to it. If you need an extra challenge you can always try the next level up!
