

Autumn Term 2 2023

Class 6 Home Learning

There are 2 areas of homework to complete each week:

1. **Reading:** You should read for 20 minutes on at least 4 days each week. The expectation is that you will record these 4 days, when you have read at home, in your Reading Record and hand this in each Monday. Your Reading Record will be returned back to you on the same day. When you read, think about what you have read, collect examples of rich vocabulary and discuss your book with an adult regularly. Vary the authors, genres and text types you select and strive to read from the Reading Rocket selection often. Also, remember to keep your activity passport, which is in the back of your reading record, up to date.
2. You need to choose either an **English or a maths activity** from the lists below to complete in your homework book and hand this in on Monday. Try to choose from each section over the term. Books will be returned to you by Thursday.

There is one optional activity to complete each week (this is very helpful if you cannot yet recall all of your times tables facts quickly):

1. **Maths:** Log on to **Times Tables Rock Stars** at home 2 - 3 times each week to practise your tables.

Trying your very best, being organised with homework and meeting these expectations will result in house points, stickers or certificates and, of course, you will be learning, practising key skills and becoming an independent learner. If the homework expectations are not fully complete, the consequence will be to complete the missing work during a break or lunch time.

English Activities:

- Read a chapter of your current reading book. Re-write it from a different character's perspective.
- Write an imaginative scene description for the setting of your book.
- Write a play/film script for a key moment in your reading book.
- Have a 'rich vocabulary' hunt through your book. Note down the meaning of at least 10 wonderful words and decide which of the 'FANTASTICS' they best fit thinking about the meaning of the sentence they appear in.
- What questions would you like to ask the author of your book? Think of at least 6.

Maths Activities:

- Use formal multiplication to solve these. Lay your work out clearly. Check your work.
 $51 \times 13 =$ $62 \times 42 =$ $17 \times 28 =$
 $45 \times 91 =$ $77 \times 11 =$ $83 \times 16 =$
 $145 \times 23 =$ $261 \times 43 =$ $407 \times 19 =$
- Use short division to solve these. Lay the calculations out clearly. Check your work.
 $372 \div 6 =$ $924 \div 3 =$ $528 \div 8 =$
 $185 \div 5 =$ $228 \div 4 =$ $1170 \div 6 =$
 $2,148 \div 4 =$ $1,841 \div 7 =$ $3,187 \div 9 =$
- Use long division to solve these. Lay the calculations out clearly. Check your work.
 $595 \div 17 =$ $1,323 \div 21 =$ $209 \div 19 =$
 $936 \div 26 =$ $1,148 \div 14 =$ $1,785 \div 35 =$
- Use your times tables and place value knowledge to solve these (you shouldn't need a formal method).
 $2,400 \div \underline{\quad} = 80$ $560 \div \underline{\quad} = 70$
 $12,000 \div 60 = \underline{\quad}$ $3,600 \div 60 =$
 $\underline{\quad} = 48,000 \div 60$ $\underline{\quad} = 8,100 \div 9$
