

Spring Term 2 2021 - 2022

Class 5 Home Learning

There are 3 areas of homework to complete each week:

1. **Reading:** You should read for 20 minutes each day, including 1 day each week from a book on Bug Club. The expectation is that you will record the 4 days when you have read your reading book at home in your Reading Record and hand this in each Tuesday. Your Reading Record will be returned back to you on the same day. Your teacher will be able to see your Progress on **Bug Club**. When you read, think about what you have read, collect examples of rich vocabulary and discuss your book with an adult regularly. Vary the authors, genres and text types you select and strive to read from the Reading Rocket selection often.
2. **Maths:** You should log on to Times **Tables Rock Stars and Numbots** at home at least 3 times each week to practise your tables and arithmetic skills.
3. You need to choose either an **English or a maths activity** to complete in your homework book and hand this in on Tuesday. Try to choose from each section over the term. Books will be returned to you each Friday.

There is a chart in your Reading Record to tick off each part of your homework daily so that you don't forget anything. Trying your very best, being organised with homework and meeting these expectations will result in house points, stickers or certificates and, of course, you will be learning, practising key skills and becoming an independent learner.

If any of the 3 homework expectations are not fully complete, the consequence will be to complete the missing work during a break or lunch time.

English Activities:

- If you could re-write the ending of Sky Hawk, what would it be like? Write an alternative ending for Sky Hawk.

Think about: What elements you want to change? What type of ending will it be e.g happy, sad, cliff hanger? What writing features are you going to include?

- Reading Comprehension – collect a reading comprehension focusing on 'Recycling' from your teacher.
- Reading Comprehension – collect a reading comprehension focusing on 'Earthquakes' from your teacher.
- SPAG Focus – punctuating direct speech. Collect a sheet from your teacher.

Maths Activities:

This half term we will be having a big focus on multiplication and Division, particularly ensuring that you are secure using long multiplication. All Maths tasks this half term are worksheet based to provide you with extra practise for the key concepts we will be learning in class.

- Long Multiplication fluency calculation worksheet.
- When you are feeling confident with long multiplication, see if you can spot other mistakes and correct them.
- Use your knowledge of multiplying and dividing by 10, 100 and 1000 to convert a variety of metric measures
- Identify prime number to 100 on the hundred grid and answer the questions.

The most important thing when multiplying and dividing is that you know your multiplication facts. Keep practising these on TTRS. If you are struggling with any of the above work have a go at using the multiplication square on our class page as a support.
