

## Summer Term 2 2023

### Class 3 Home Learning

#### There are 3 areas of homework to complete each week:

1. **Reading:** You should read for 20 minutes on at least 4 days each week. The expectation is that you will record these 4 days, when you have read at home, in your Reading Record and hand this in each Monday. Your Reading Record will be returned back to you on the same day. When you read, think about what you have read, collect examples of rich vocabulary and discuss your book with an adult regularly. Vary the authors, genres and text types you select and strive to read from the Reading Rocket selection often.
2. **Maths:** You should log on to **Times Tables Rock Stars and Numbots** at home at least 3 times each week to practise your tables and arithmetic skills.
3. You need to choose either an **English or a maths activity** to complete in your homework book and hand this in on **Monday**. Try to choose from each section over the term. Books will be returned to you each **Thursday**.

Trying your very best, being organised with homework and meeting these expectations will result in house points, stickers or certificates and, of course, you will be learning, practising key skills and becoming an independent learner.

If any of the 3 homework expectations are not fully complete, the consequence will be to complete the missing work during break time on Thursday morning. If there is more than 1 expectation missing, you will also need to stay in during Thursday lunch time.

#### English Activities:

**The English homework is based on your reading books. Therefore, regular reading (and reading books from beginning to end) will help you do these activities well.**

- Read a book or a graphic novel about a superhero. Use your imagination to think of superpowers for members of your family. Write a short description to explain what power you chose for them and why.
- Choose 5 words from your reading book that can be made in to calligrams. Be as creative as you can!

- Choose a setting from your reading book. Can you write a setting description of it? Use your senses to help you – what can you see? What can you hear? What can you touch? How does it smell? Try to use some adventurous adjectives.
- Find and read some acrostic poems. Then become a poet and create your own acrostic poem about your favourite person, pet or hobby.

#### Maths Activities:

- Look out of your window and complete a car survey. You could count how many cars you see that are different colours. Record your data as a tally chart and then present as a graph.
- Measure your footprint and at least one other family member's footprint. Can you measure it in centimetres, millimetres and inches? Write down each measurement. Compare the footprints – which one is smallest? Which is biggest?
- Accurately draw 4 clocks in your book. Make each time on the clock:  
1) 12:30    2) 4:20    3) 8:45    4) 11:15
- Measure the length of 6 different items in your house or garden. Using the measurements, order them from smallest to biggest and biggest to smallest.
- Go on a walk. Find and write a list of 2D shapes you see. For example, a circular road sign. Challenge yourself by finding 3D shapes aswell!
