

## Summer Term 1 2026

### Class 4 Home Learning

**There are 3 areas of homework to complete each week:**

1. **Reading:** Read for **20 minutes at least 3 days every week**. Your **adult needs to record these 3 days in your**

**reading record** and **hand this in every Monday**. When you read, think about what you have read, collect examples of rich vocabulary and discuss your book with an adult regularly. Vary the authors, genres and text types you select and strive to read from the Reading Rocket selection often.

2. **Maths:** Practise your times tables on **Times Tables Rock Stars** at home **at least 3 times each week**.

3. Choose **either an English or a maths activity** to complete in your homework book and hand this in on **Monday**. Try to choose from each section over the half-term. Books will be returned on Thursdays.

Trying your very best, being organised with homework and meeting these expectations will result in Dojo points and, of course, you will be learning, practising key skills and becoming an independent learner. If any of the 3 homework expectations are not fully complete, the consequence will be to complete the missing work during break or lunch time on Friday.

#### English Activities:

- Spellings – try to practise your spellings regularly. If you have a sheet with the Y3/4 spellings stuck in your homework book, they will be highlighted to show which spellings to focus on. If not, spellings to focus on will be written in your book every week.
- Ask for the Anglo Saxons reading comprehension sheet.
- Find interesting information and pictures about any Anglo-Saxon ruins that can still be found today. Present this information in an interesting way of your choice.
- Ask for the SPaG sheet to practise using inverted commas.
- Work on your presentation skills by finding a poem that you really enjoy reading and write it out in your neatest handwriting. I look forward to reading your chosen poem!

#### Maths Activities:

- Complete an arithmetic test from Mathsbot.com
- Complete a times tables test on timestables.co.uk
- Write down 10 decimal numbers up to 2 decimal points. Then write them in order from smallest to biggest e.g. 0.43, 0.44, 0.67.  
**Challenge yourself to include some with the same number in the tenths column.**
- Ask for a fraction sheet and shade and label fractions of shapes.
- Complete the fraction problem solving sheet.
- <https://www.topmarks.co.uk/maths-games/daily10> (type in top marks daily ten to the search engine if you cannot use the link). Practise your maths skills on the daily 10 game. Level 4 includes adding and subtracting 4 digit numbers. If this is too challenging try a lower level and build up to it. If you need an extra challenge you can always try the next level up!
